ABOUT ME

For as long as I can remember I've been passionate about **Level Design**. I turned that enthusiasm into a professional career after attaining my **bachelor's degree** in **Digital Arts & Entertainment**. I've been working in the games industry since 2011 and have shipped plenty of AAA titles.

As a **level designer** and **scripter** I enjoy working with people across multiple disciplines and have no problems communicating ideas and bringing those to life. I am proficient in all design skills from **paper design**, **prototyping** and **scripting**. I enjoy working with visuals but don't shy away from a technical challenge.

Colleagues have described me as **level-headed**, **dependable**, and someone who can help a team meet quality and ship on time.
